(54) PLURAL-COMPUTER OPERATION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To efficiently operate respective computers by considering the throughput of the respective computers and the using state of a network, estimating the execution time of jobs and automatically distributing the jobs based on it.

SOLUTION: This plural-computer operation system for distributing data processings to the plural computers #1-#n connected by the network 2 is provided with a plural-computer operation controller 11 for checking whether or not an error is generated at least in the network 2 among the respective computers #1-#n, memories 16 connected to the respective computers #1-#n and the CPUs 15 of the respective computers #1-#n at every constant interval of time and obtaining the checking information.

LEGAL STATUS

[Date of request for examination] 22.11.2002

[Date of sending the examiner's decision of rejection] 26.07.2005

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection] 2005-016260

[Date of requesting appeal against examiner's decision of rejection] 25.08.2005
